

Part B: Ball-Bounce Fair Test

Name: _____

Write a testable question and a reasoned prediction before you start collecting data.

Testable Question: _____

Reasoned Prediction: _____

Set up the table below to collect data (either from the online videos or from your own experiment). Remember to include your independent and dependent variables here and the units you will be measuring in.

				AVERAGE
				$= \frac{\text{Test 1} + \text{Test 2} + \text{Test 3}}{3}$

Did your data **support** or **not support** your reasoned prediction? Why?
